

# ALLISON BINGER

Software Engineer | Web Developer | Data Specialist | Cybersecurity Analyst

918-625-3186 | [allisonabinger@gmail.com](mailto:allisonabinger@gmail.com) | [LinkedIn](#)

---

## SKILLS AND TECH STACK

Full Stack Web Development – ReactJS, HTML, CSS, JavaScript, NodeJS, SQL, RESTful APIs, User Authentication, Mobile Development, UI/UX Design, Firebase, Firestore, Dart, OOUX

Software Engineering – Version Control, Unit Testing, Asynchronous Programming, C, Bash, Documentation

Networking & Cybersecurity – SIEM, Endpoint Security, Network Administration, VMware, Wireshark

Database Management – SQL, NoSQL, RDBMS, ETL, Database Performance Optimization

## EDUCATION AND CERTIFICATES

Computer Science and Full Stack Web Development  
Diploma, Atlas School

December 2024

- Full Stack Development: Built custom back-end services (RESTful APIs, SQL, NoSQL) and accessible front-end interfaces (HTML, CSS, JavaScript, ReactJS, React Native), focusing on data analytics, real-time data transmission, server functions, and workflow design
- Project Management and Collaboration: Led team projects using SCRUM methodologies and tools, optimized workflows, and ensured effective team collaboration through version control

Cybersecurity Analyst Certificate  
Certificate, Thinkful

May 2023

## EXPERIENCE

Auditing Technician  
Tenstreet - Tulsa, OK

January 2025 - Present

- Analyzed and audited individual documents to ensure compliance with federal regulations for a client managing over 5,000 CDL drivers
- Standardize, clean, and organize files while identifying discrepancies and optimizing integrity.

## HIGHLIGHTED PROJECTS

YardHopper  
Database Architect

December 2024

Designed and implemented the database architecture and back-end services for a platform connecting users to garage sales via an interactive map and customizable filters, enabling seamless search, detailed listings, and efficient route planning. Utilizes cloud functions, data extraction, blob storage, mobile development, and geolocation tools.

Hero of Flavor  
Back-End Specialist

August 2024

Utilized ETL strategies to create a database and custom API as a companion to a popular Nintendo video game. Allows for efficient player usage utilizing MongoDB, React.js, and Express.
